Multi-lingual service available in English & French

Want to export your MSDS book? You can with our new Generate PDF Book(s) option! Create a downloadable PDF version of your Master Book or a Sub-book including page numbering and a Table of Contents.

A compliance initiative

- Maintaining an up-to-date Material Safety Data Sheet (MSDS) inventory that is easily accessible to employees across your workplace is a legislative requirement
- Failure to comply with Occupational Health & Safety regulations puts an organization and its employees at risk
- Meeting these requirements can be a labour-intensive and costly proposition when using traditional, paper-based systems
- Innovative and effective e-solution tool - **Link2MSDS**

No hassle deployment

- Link2MSDS is a web-based service that is accessed via the Internet or Intranet
- No software installation or systems upgrading required
- A secure site that is password protected for administrative functions with extensive back-up procedures to minimize any risk of service interruption

Feature rich

- Link2MSDS is specifically designed as a cost-effective method of retrieving, tracking and updating expiring MSDSs
- Offers automatic updating, notification, MSDS requests, reporting and data export capabilities
- Create workplace labels and archive MSDSs
- Searching capabilities through an *Intranet* Quick Link for general users with no login requirements

Eco friendly

- Near elimination of paper-usage in MSDS filing
- Diminished post-production/post-consumer waste as a result of more efficient work
